Use your data to make a better decision, faster

You have capable people, multiple data sets, and an analytics platform...

And there are still important business questions you can't answer.

AgKG 4.1
by SURROUND Australia

Source data quality
Know what you're working with.
We reveal and define your data.

Refined search results
Use advanced ontologies & semantic technology to focus on useful data.

Link disconnected data
Map the metadata across your data sets through data fabrics & knowledge graphs.

Re-use existing data
We leave the data where it is, and enable you to reuse it more effectively.

www.surroundaustralia.com

Agribusiness companies rely on multiple data sets

Connect those data sets so you can query them all at the same time

For better insight, to make informed business decisions

Needle in a Haystack 4.1
Connect 2 data sets together, using a knowledge graph linked data solution.

Combine Data Harvester 4.1
Connect all your data sets together, using a knowledge graph linked data solution.

Make a decision today. Call me.
